

Mendel Centre Seminars Spring 2020

Tuesdays 3 p.m., A11/205, University Campus

De novo identified DNA repeats localized on chromosomes of Heliophila species

Contributed by Martin Lysak Group

MARCH

31/03/2020 **Dr. Charo I. del Genio**
Coventry University, UK
A Retrotransposon Surveillance Mechanism That Safeguards Plant Male Fertility During Heat Stress
Hosted by: Tomasz Nodzyński

APRIL

07/04/2020 **Assoc. Prof. Dr. Mark Beilstein**
University of Arizona, School of Plant Sciences, USA
The Varied Roles of RNA in the Regulation of Plant Genomes
Hosted by: Jiří Fajkus

21/04/2020 **Andrea Ficke**
NIBIO, Ås, Norway
Leaf and Stem Diseases in Cereals and Oilseed Crops – a Relationship Too Close for Comfort
Hosted by: Helene Robert Boisivon

28/04/2020 **Arun Sampathkumar**
MPI, Cologne, Germany
Mechanical Control of Cytoskeletal and Cell Wall Machinery Regulating Morphogenesis in Plant
Hosted by: Jan Hejátko

MAY

05/05/2020 **Souad Mroue**
CEITEC MU, Czech Republic
Gynoecium Morphogenesis: Unveiling of New Elements of the Gene Toolkit
Hosted by: Helene Robert Boisivon

12/05/2020 **Jean W. H. Yong**
Swedish University of Agricultural Sciences, Sweden
The Fascinating World of Biostimulants
Hosted by: Jan Hejátko

19/05/2020 **Andrew R. Leitch**
Queen Mary University of London, UK
Nucleotype-ecological Interactions: How Genome Size Constrains Plant Distributions
Hosted by: Jiří Fajkus
