

PRINCIPAL INVESTIGATOR

SEMINAR SERIES 2018

WHERE: University Campus, Building A11, room 205

WHEN: Every Friday – From 13:00 (Autumn Semester)

OCTOBER

05/10/2018 **Marek Mráz**

Microenvironment of Immune Cells, CEITEC MU

Microenvironmental interactions in B cell leukemias/lymphomas: from biological mechanisms to better targeted therapies

12/10/2018 **Stjepan Uldrijan**

Department of Biology, Faculty of Medicine

Targeting oncogenic MAPK signaling in melanoma

19/10/2018 **Dáša Boháčiková**

Department of Histology and Embryology, Faculty of Medicine

Modelling neural differentiation in vitro using human pluripotent stem cells

26/10/2018 **Víťa Bryja**

Department of Experimental Biology, Faculty of Science

Machineries controlling cell migration as a therapeutic target

09/11/2018

Helene Robert Boisivon

Hormonal Crosstalk in Plant Development, CEITEC MU

Characterisation of novel transcriptional regulators of local auxin biosynthesis for fruit and seed morphogenesis in Arabidopsis and oilseed rape

16/11/2018

Jiří Damborský

Department of Biology, Faculty of Medicine, MU

Computational Protein Design

23/11/2018

Lumír Krejčí

NCBR, Faculty of Science Department of Biology, Faculty of Medicine

Repair of breaks and replication

30/11/2018

Karel Říha

Plant Molecular Biology, CEITEC MU

Role of RNA processing in plant germ line differentiation

NOVEMBER

02/11/2018 **Michal Šmída**

Functional Genomics, CEITEC MU

Functional genomics to predict novel targets for personalized therapy of B-cell malignancies

DECEMBER

07/12/2018 **Andrea Vetešníková Šimková**

Department of Botany and Zoology, Faculty of Science

Parasites of freshwater fish in the light of evolution of their hosts

EVERYONE IS WELCOME
