Due to possible emergency measures concerning the spread of coronavirus, the events may be cancelled. Please read our website or Events of the Week for updates.

OCTOBER

16/10/2020 **Josef Bryja**
 Faculty of Science (Dept. of Botany and Zoology); Czech Academy of Sciences (Institute of Vertebrate Biology)

Why Are Biodiversity Hot-spots So Diverse and How Can the Genetic Studies of African Rodents Help to Understand It?

23/10/2020 **Nicola Silva**
 Faculty of Medicine

Poly (ADP-ribose) Glycohydrolase PARG Promotes Induction and Homology-mediated Repair of Meiotic DNA Double-strand Breaks

30/10/2020 **Zbyněk Prokop**
 Faculty of Science (Kinetics and Microfluidics)

New Enzymology Kinetics and Microfluidics

NOVEMBER

06/11/2020 **Petr Skládal**
 Nanobiotechnology Group, CEITEC MU

Biosensors

13/11/2020 **Ondřej Slabý**
 Molecular Oncology - Solid Cancer Group, CEITEC MU

Whole-exome Sequencing and Comprehensive Fusion Analysis as Instruments of Pediatric Precision Oncology: From Tumor Biology to Treatment Decisions

20/11/2020 **Pavel Bouchal**
 Faculty of Science (Dept. of Biochemistry)

Proteomic Portrait of Breast Cancer

27/11/2020 **Gabriel Demo**
 Structural Biology of Coupled Transcription-Translation Group, CEITEC MU

Simultaneous Gene Transcription and Translation in Bacteria

DECEMBER

04/12/2020 **Gorazd Bernard Stokin**
 Translational Ageing and Neuroscience Program, Centre for Translational Medicine, St. Anne's University Hospital

Mechanisms Underlying Development of Alzheimer's Disease

EVERYONE IS WELCOME
