

Molecular Medicine Seminar

2019

Tuesdays at 9.30 a.m., room no. 211 / A35

FEBRUARY

19/02/2019 **Sonali Sharma**
Marek Mraz RG
Identification of a miR-29 target in Chronic Lymphocytic Leukemia: implications for microenvironmental interactions

16/04/2019 **Natalia Anna Gablo**
Ondrej Slaby RG
Circulating microRNAs in pancreatic cancer

23/04/2019 **Helena Peschelova**
Michal Smida RG
The use of CRISPR/Cas9 technology for functional genetic screening

MARCH

05/03/2019 **Nandan Varadarajan**
Stepanka Vanacova
RG – Structural Biology
Examining factors mediating oligo uridylation of eukaryotic aberrant RNAs

30/04/2019 **Ketty Sinigaglia**
Mary O'Connell RG
Investigating mRNA modifications using murine models

19/03/2019 **Maria Metsger**
Dmitriy Chudakov RG
Immunity and aging in long-lived animals: insights from the blind mole rat systems analysis

MAY

07/05/2019 **Tina Catela Ivković**
Ondrej Slaby RG
room no. 145
Non-coding RNAs and exosomes in colorectal cancer

APRIL

02/04/2019 **Michal Rajecky**
Dalibor Blazek RG
Function of transcriptional cyclin-dependent kinases

14/05/2019 **Jakub Trizuljak**
Sarka Pospisilova RG
Recognition of pathogenic variants in cancer patients: First year experience from clinical genetics outpatient ward

09/04/2019 **Cosimo Lobello**
Sarka Pospisilova RG
room no. 145
Can the mutational landscape give information about the prognosis in ALCL? - DNA targeted NGS in Anaplastic Large Cell Lymphoma

21/05/2019 **Jaclyn Elizabeth Quin**
Mary O'Connell RG
ADAR1 as a new target for the fighting against malaria
