

Molecular Medicine Seminar

2021

Tuesdays at 9.30 a.m., room no. 211 / E35

SEPTEMBER

21/09/2021 **Veronika Rájecká**
Štěpánka Vaňáčková RG
The New Machines
Involved in the Formation
of 3' termini of Eukaryotic
mRNAs

OCTOBER

05/10/2021 **Petr Šimeček**
Panagiotis Alexiou RG
The Language of DNA:
Using NLP Neural Network
Methods to Classify
Genomic Sequences

19/10/2021 **Karolína Trachtová**
Ondřej Slabý RG
Bioinformatic Pipeline for
Analysis of Small RNA-seq
Data

26/10/2021 **Valentina Lacovich
Stražil**
Mary O'Connell RG
Amyloid Precursor Protein
and Traumatic Brain Injury

NOVEMBER

02/11/2021 **Tomas Reigl**
Šárka Pospíšilová RG
LYNX: an Interactive
Bioinformatic tool for Next-
generation Sequencing
Data Analysis in Lymphoid
Malignancies

09/11/2021 **Pedro Faria Zeni**
Marek Mráz RG
The Role of lncRNA in BCR-
mediated CLL Activation

23/11/2021 **Táňa Macháčková**
Ondřej Slabý RG
miR-215 in Colorectal
Cancer

30/11/2021 **Petr Tauš**
Šárka Pospíšilová RG
Interrogating Cellular
Origin of CLL Through
Computational
Approaches

DECEMBER

07/12/2021 **Daniel Filip**
Marek Mráz RG
miRNA Regulation of
B-T Cell Interactions in
the Aggressiveness and
Transformation of Follicular
Lymphoma

14/12/2021 **Kamila Součková**
Ondřej Slabý RG
Establishment and
Characterization of
Cell Lines Derived from
Nothobranchius Embryos
